

## **Advisory Committee Call November 15, 2009**

### Members on the call:

Lorraine, Chris, Tim, Jim, Brian, Jenn, Lee

### Performance Space

-The 2010 rulebook has been changed to say that the competition area will measure a minimum of 50' x 90' when it has been 60' x 90' before.

How did we get to the 50' x 90' space that is listed in the 2010 rulebook?

Where is the communication about this?

Lee/Lorraine will check with the EC on the next call about the rulebook change

-There is a concern of not enough gyms to host shows with the 60' x 90' competition area.

The AC has suggested that Fri/Sun shows be given fewer requirements for space/seating/bleach height and that Sat shows have the requirements listed in the rulebook. This is outlined in the "Competition Rules and Specs" document.

-Suggestions to have members of the AC and/or contest coordinators go to potential show sites and gather information in a database. It would cover some of the following:

Performance space

Ceiling height

Bleacher rows

Entrance/exits

-Discussed what happened with our "Competition Rules and Specs" document sent to the EC after the Spring Meeting in May. The last that the AC knew of was a response sent to the EC by the AC on a few items of clarification. What happened to this since?

### AC Logistics

-AC portion of the website should on the website by Thanksgiving weekend

-AC list of members needs to updated on the website

-Discussed the Mentor Program and what the future of it would be.

Solution: The AC will serve as a "logistics reminder" and send emails to units.

One standard email sent to all units

Each AC member will have a group of units to check-in with based upon zip codes. Lorraine will gather our zip codes and separate the units to us.

### Next Meeting

-Looking into more economical ways of having conferences: Skype? iChat? Internet site?

-Starting in January, possible meetings on Sundays every two weeks
